SUMMARY

Highly motivated AI/ML and MLOps Developer skilled in building scalable ML systems using Python, FastAPI, and GenAI. Experienced in architecting end-to-end AI applications with LLMs (LangChain), computer vision, and RESTful APIs. Proven track record in open-source contribution with published packages on PyPI and NPM, and a strong foundation in MLOps for model deployment.

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL, HTML/CSS, French (Basic)

ML/AI & GenAI: Machine Learning, Deep Learning, LLMs, LangChain, Prompt Engineering, PyTorch

MLOps & Backend: FastAPI, Node.js, Express.js, Model Deployment, Hugging Face Spaces, REST APIs

Tools & Frameworks: React, MySQL, Git, Postman, Linux, Docker, PyPI, NPM

EXPERIENCE

AI/ML & MLOps Developer (Self Projects & Open Source)

Remote

- Built and deployed **20+ AI/ML and GenAI projects**, focusing on end-to-end integration and API-first design.
- Developed and published **@vashuthegreat/vexpress** (NPM), an automated API documentation generator for Express.js.
- Created **vconsoleprint** (PyPI), a Python package for enhanced terminal output formatting for developers.
- Deployed multiple high-performance ML models on **Hugging Face Spaces** (username: VashuTheGreat2).
- Maintain a technical YouTube channel sharing demos and deep-dives into ML architectures for the developer community.

PROJECTS

ML Learner Platform | *FastAPI, Python, React, Scikit-Learn*

- Architected an interactive learning ecosystem to simplify ML concepts for beginners through real-time model visualization.
- Developed robust backend APIs using **FastAPI** to serve multi-algorithm predictions on real-world datasets.

AI-Powered Product Recommendation System | *GenAI, Computer Vision, ML*

- Engineered a hybrid recommendation engine combining Collaborative Filtering and Content-Based Filtering for high accuracy.
- Implemented **Computer Vision** for image-based product retrieval, allowing users to find products via visual similarity.

GenAI & LLM Application Suite | *LangChain, OpenAI API, Hugging Face*

- Built production-ready LLM workflows using **LangChain**, optimizing prompt engineering for complex reasoning tasks.
- Integrated model monitoring and deployed the suite on Hugging Face Spaces for public accessibility.

EDUCATION

Ajay Kumar Garg Engineering College (AKGEC)

Ghaziabad, India

- Bachelor of Technology in Computer Science (AI & ML)
- Relevant Coursework: Data Structures & Algorithms, Machine Learning Foundations, Neural Networks.
- Active member of technical societies; Participant in various coding contests and hackathons.
